

Deeside Timberframe Meet Increased Demand with Hundegger Investment

Responding to a surge in demand and a commitment to leading the timber frame construction industry, Deeside Timberframe has integrated the **state-of-the-art Hundegger Saw** into their operations.

This strategic move is designed to enhance production efficiencies, enabling the company to accommodate a growing portfolio of projects across residential, commercial, and affordable housing sectors more effectively.

This investment is part of Deeside Timberframe's broader initiative to expand its product offerings and streamline its manufacturing processes. The introduction of the Hundegger Saw, known for its high precision and fully automatic capabilities, marks a significant step change for the company. It is a clear indicator of the intent to solidify its presence across the UK, aligning with its recent growth trajectory and ambitious expansion plans.

David Crawford, Managing Director, Deeside Timberframe, emphasised the importance of this advancement: "Integrating the Hundegger Saw into our production line is a transformative milestone. It significantly boosts our capacity, essential for keeping pace with the increasing demand. This investment not only reflects our commitment to innovation but also our dedication to delivering quality and sustainable solutions in timber frame construction."

This collaboration between Deeside Timberframe and Hundegger exemplifies the synergy of cutting-edge technology with industry expertise to meet the evolving needs of the construction sector. It is a powerful testament to how strategic investments in technology can propel the industry forward, setting new standards for efficiency, quality, and sustainability. ◆
